I am not an IT person and the fact is, all last week and back today to work on the Administration building network issues.

There is upgrading and other lines etc which the tribe had planned for August of last year.

What I do know is this, I personally bought an Antivirus for the computer I use at work because of being down and not productive. The free AVG was not working.

I am not pleased with this.

Trying to do my part but this is awful.

Appreciate your assistance.

Cynthia

Hi Cynthia –

I am just checking on the status of the GAP application on Grants.gov. I have the hardcopy app that you submitted and we're working off of that, but will eventually, need an app come through Grants.gov.

Our HQ office is tracking our applications.

Thanks

Renee Chan

Hello,

The challenges of our computers not having protection from viruses and our poor internet has driven me to this level of grief I never thought I could reach at this level of my career.

I truly love my tribe, but my driving force is correcting and moving us forward, which was completely tested this week.

I have provided copies of the application I entered earlier today. This afternoon our internet is slow. Please let me know if you receive this email.

Talking to Chairman, He says we will have an IT person coming in next week. I have done my best to be patient.

Attached please find the SF424 that took several attempts to complete. My computer has some serious issues I have learned but the folks at Grants.Gov were terrific each time I spoke to them!

My printer will not scan to my computer so I have to ask the receptionist to scan to her computer and then send it to me. This is crazy.

Thank you for your help and encouragement.

Cynthia O.
